Education

Durham University Master of Engineering in Computer Science (Predicted 2:1) Relevant Courses: Reinforcement Learning, Deep learning, Algorithms and Data Structures (Python) Networks and Systems, OOP (C++), Data Science, Software engineering, NLP, Computer vision	Durham, UK Sept 2022 - Jun 2026
Beijing Language and Culture University (BLCU) Chinese Language Program	Beijing, China Jun 2025 - Aug 2025

Skills

Programming: Python, JavaScript, C, C++, C#, PyTorch, Pandas, Numpy, RAG, VBA, HTML, CSS
Tools: Git, Node.js, React.js, Postman, JSON, REST APIs, Bootstrap, Figma
Databases: MongoDB, MySQL, DynamoDB
Languages: Thai (Native), English (Fluent), Mandarin (Intermediate, conversational)

Experiences

Thanachart Insurance	Aug 2024 - Oct 2024
-----------------------------	---------------------

Software Engineering Intern | *Python, DynamoDB, AWS*

- Developed an AI customer service chatbot using **Large Language Models (LLMs)** and **Retrieval-Augmented Generation (RAG)** techniques via OpenAI and AWS Bedrock APIs.
- Integrated DynamoDB for automated insurance queries, combining **LLM** responses with company data.

Bank of China (Thailand)	Jun 2024 - Jul 2024
---------------------------------	---------------------

IT Intern | *Excel, VBA*

- Developed IT asset management system in VBA with secure login and integrated database.
- Collaborated with the teams to gathering requirements and produced technical documentation.

Kiatnakin Phatra Financial Group	Jul 2023 - Aug 2023
---	---------------------

Wealth management Intern

- Analysed investment portfolios for risk and optimised asset allocation.
- Collaborated with the wealth management team on case-competition style portfolio analysis.

Teparak Spinning co.ltd	Jul 2022 - Aug 2022
--------------------------------	---------------------

Intern

- Assisted in yarn quality control, sales accounting, and manufacturing processes.
- Designed and managed an inventory tracking system to monitor the stock levels.

Projects

E-commerce website | Python, JavaScript, HTML, AJAX, RESTful API, Bootstrap, Git

- Designed and developed a fully responsive coffee capsule e-commerce platform.
- Integrated **RESTful APIs** and **AJAX** for real-time cart updates, inventory tracking, and checkout processes.

Elemore Hall School Academic Tracker Website | Python, JavaScript, HTML, Node.js, MongoDB

- Built and Designed a secure database architecture supporting 200+ student records with real-time grade tracking and implemented role-based access control to ensure data integrity.
- Applied **Agile methodology (Scrum)**, iterative sprints, and stakeholder feedback to enhance features and usability.

Bombberman Game | Unity, C#

- Designed modular game logic for a 2D action game, ensuring maintainability and extensibility.
- Applied object-oriented programming and Unity physics to implement collision detection, power-ups, and bomb mechanics

RFID Fabric & Weight Tracking System | Python, Excel

- Integrated RFID hardware to automatically log fabric IDs and weights into inventory system.

Leadership and Volunteering

PaITV	Aug 2023 - Jul 2024
--------------	---------------------

Engineer, Graphic Designer

- Coordinated with engineering team to maintain streaming infrastructure and designed graphics for broadcasts.

Durham Thai society	Jun 2023 - Jun 2024
----------------------------	---------------------

Social secretary, Marketing director

- Organised events and built a network of students, faculty, and industry professionals while leading the society's social media marketing.
